

# PLATECAT GEN.3 PLATE CARRIER

## DESCRIPTION

The Platecat gen.3 is a cutting edge plate carrier designed around the NATO plate format.

Four ROC buckles allow fast donning/doffing.

The cummerbund design pushes the back plate to the correct height to protect the heart arteries—unlike most plate carriers. It can carry soft and hard armor with optional components.

The cummerbund and shoulder straps adjust while worn.

Optimized for hot climates—it dries quickly and accepts ventilation/comfort pads on all sides.

The Cordura laminate used for PALS is very durable while allowing many pouch mounting positions.

The Platecat can be extended with front modular panels, chest rigs, back zippered panels and ballistic addons.

Other plate formats are available (SAPI M, L, XL).

## KEY FEATURES

- ROC buckles allow quick opening and closure
- Ergonomic positioning of the plates
- Laser cut laminate PALS grid
- Lightweight (680g) and quick drying
- Front document pocket and cable Velcro loops
- Accepts torso comfort pads for increased ventilation
- Accepts zippered back panels
- Accepts modular front panels and chest rigs
- Ballistic coverage can be extended with addons

## PRODUCT DATA

Name	Platecat Gen.3
Main fabric	Cordura 500D NIR Laminate Cordura 500/500D NIR
Sizes	S1 (80-100cm) S2 (88-108cm) S3 (96-116cm)
SB+HB Geometry	250x300x35mm, 150x150x35mm

## AVAILABLE COLORS

Black

Coyote

Ranger

Multicam
